

INFORMATION TECHNOLOGY STUDENT

Motivated Information Technology student with hands-on experience in deep learning, computer vision, and embedding-based AI systems. Skilled in building AI-driven applications involving visual data, similarity search, and intelligent automation. Strong foundation in vector-based representations, model training, and data pipelines, with growing exposure to cloud platforms and front-end technologies. Interested in applying Generative and Multi-modal AI to real-world visualization and automation problems.

TECHNICAL SKILLS

Programming	: C++, Python, Java
Data Tools	: Pandas, NumPy, Matplotlib
Databases	: MySQL, MongoDB
Web Technologies	: HTML, CSS, JavaScript
Data Visualization & Analytics	: Power BI, Tableau, Data Cleaning & Transformation

PROJECTS

Intrusion Detection System <i>Python, Deep Learning, Computer Vision, CNN</i> - Designed an AI-based visual anomaly detection system using deep learning and CNNs. - Built end-to-end pipelines including data preprocessing, feature extraction, and model training. - Worked with high-dimensional feature vectors for classification and anomaly detection. - Applied computer vision techniques for real-time security monitoring scenarios. - Improved security monitoring and threat detection aligned with real-world cybersecurity scenarios.
ModaMuse – Virtual Wardrobe <i>Python, Embeddings, Image Processing</i> - Implemented embedding-based similarity search using vector representations for outfit matching. - Designed ranking logic based on distance metrics in vector space. - Built a recommendation pipeline combining image processing and semantic similarity.
Learning Stock Market Through Gamification <i>Python</i> - Developed a gamified stock market simulation using virtual capital. - Tracked and analyzed user trading behavior and performance metrics. - Enhanced financial learning through interactive and data-driven gameplay.

EDUCATION

MIT ADT University <i>B.Tech in Information Technology CGPA: 6.51</i>	Pune, India 2022 – Present
Shree Haribhau Balavantrao Girme Jr. College <i>12th Grade 75%</i>	Pune, India 2020 – 2022
Podar International School <i>10th Grade 71.9%</i>	Pune, India 2019 – 2020

CERTIFICATIONS

- Coursera – Fundamentals of Visualization with Tableau
- Coursera – Introduction to Microsoft Azure Cloud Services
