ASPIRING SOFTWARE DEVELOPER

Information Technology undergraduate with strong foundations in data analytics, backend development, and AI-driven systems. Hands-on experience building data-driven platforms, API-based systems, and dashboards to support real-world decision-making. Passionate about applying technology to optimize operations, improve efficiency, and support sustainable engineering solutions.

TECHNICAL SKILLS

Programming : C++, Python, Java
Data Tools : Pandas, NumPy, Matplotlib
Databases : MySQL, MongoDB
Web Technologies : HTML, CSS, JavaScript, REST APIs, Postman
Data Visualization & Analytics : Power BI, Tableau, Data Cleaning & Transformation

PROJECTS

Turf Slot Booking System

MongoDB, Node.js, Postman

- Developed a scalable backend system for turf booking using Node.js and MongoDB.
- Implemented authentication, role-based access, and optimized booking logic to prevent conflicts.

ModaMuse – Virtual Wardrobe

Python, Embeddings, Image Processing

- Implemented similarity search using vector embeddings.
- Built recommendation ranking models for personalized outfit suggestions.

Learning Stock Market Through Gamification Python

- Developed a gamified stock market learning system to simulate trading with virtual capital and analyze user investment performance.

EDUCATION

MIT ADT University

B.Tech in Information Technology | CGPA: 6.51

Pune, India

2022– Present

Shree Haribhau Balavantrao Girme Jr. College

12th Grade | 75%

Pune, India

2020 – 2022

Podar International School

10th Grade | 71.9%

Pune, India

2019 – 2020

CERTIFICATIONS

- Coursera – Fundamentals of Visualization with Tableau
- Coursera – Introduction to Microsoft Azure Cloud Services
